

Brooks Estadt II

Greater Scranton Area, PA | (570) 862-8065 | brooksestadt80@gmail.com | <https://crunchybrunch.github.io>

Objective: Structural engineering internship for Summer 2027.

Education

The Pennsylvania State University - College of Engineering
B.A.E./M.A.E. in Architectural Engineering, Structural Option
Cumulative GPA: 3.85/4.00

University Park, PA
Expected May 2029

Experience

Greenman-Pedersen, Inc.
Structural Engineering Intern

Scranton, PA
May 2026 - Aug. 2026

- Built a Python AISC section-finder that compared field dimensions with AISC properties within +/-5% tolerances, supporting faster review of existing steel members.
- Supported project engineers across active building work by contributing to structural design and analysis in AutoCAD, Revit, Bluebeam, RAM, and TEDDS.
- Conducted field surveys and communicated as-built conditions through CAD drawings and structural models to support downstream design coordination.

NASA Undergraduate Research Internship Program (URIP) - Penn State
Research Intern

University Park, PA
Oct. 2024 - Dec. 2025

- Analyzed remote-sensing and ArcGIS data to evaluate flood susceptibility and infrastructure vulnerability.
- Presented flood-risk findings to academic audiences, translating analysis into concise visuals and verbal explanations.

Project Experience

CAD/Revit C&C Wind Generator

Engineering Automation

- Packaged a Python desktop workflow for coworkers that parses completed TEDDS component-and-cladding output into DXF, CSV, JSON, and QC deliverables for engineer review.
- Advanced a Revit renderer through live proof-of-concept testing milestones, reducing repetitive drafting setup.

PSU Steam Services Building

Revit Existing-Conditions Model

- Collaborated with classmates during in-person surveying of an existing Penn State facility, dividing building areas and sharing dimensions to close gaps in field data.
- Combined shared field measurements with Bluebeam plans to recreate architectural and structural systems in Revit.

NEPA Bridge Design Competition

Structural Design & Fabrication

- Designed, fabricated, and load-tested an individual AutoCAD truss bridge prototype for a regional bridge design competition.
- Collaborated with teammates to compare design and fabrication successes and failures, applying shared lessons to subsequent bridge iterations.

Honors & Awards

White Trustee Scholarship | Dean's List (Fall 2024 - Spring 2026) | President Walker Award

Technical Skills

CAD/BIM: AutoCAD, Revit, Bluebeam | **Structural:** RAM, TEDDS

Programming/Data: Python, Excel, ArcGIS, Git/GitHub
